Data 110-Markdown HW

Homework: Markdown Practice in GitHub

Objective

The objective of this assignment is to enhance your Markdown skills and apply them in a real-world tool - GitHub. You will use your existing repository (created previously in class) to create a new file and practice Markdown formatting.

Instructions

1. **Navigate to Your Existing Repository:**
   - Log in to your GitHub account.
   - Navigate to the repository you created earlier in class (e.g., `Data110`).
2. **Create a New Markdown File:**
   - In your repository, click on "Add file" and then "Create new file."
   - Name your file `Markdown-Exercise.md`.
3. **Practice Markdown:**
   - In your new `Markdown-Exercise.md` file, practice your Markdown skills:
     - Add a section at the top called "Author" and include your name and date.
     - Include at least one example of each of the following Markdown elements:
       - Headers
       - Emphasis (bold and italic text)
       - Lists (ordered and unordered)
       - Links
       - Images (you can use any online image URL, or image of your cat or dog or anything you like)
       - Blockquotes (one of your favorite one)
       - Inline code and code blocks
       - Tables
       - Task Lists (lets say a new resolution and assume you done some of them)
       - Footnotes
   - Feel free to be creative with the content! You can write about a hobby, a project idea, or anything that interests you.
4. **Commit Your New File:**

- After adding your content, scroll down to the "Commit new file" section.
- Enter a commit message that describes your changes, such as "Add Markdown-Exercise.md."
- Choose the "Commit directly to the main branch" option.
- Click on "Commit new file".
5. **Submit Your Work:**
   - Copy the URL of your `Markdown-Exercise.md` file from your repository.
   - Submit the URL by pasting it into the designated submission area in our class MS Teams channel or as instructed by your teacher.

Evaluation Criteria

Your homework will be evaluated based on:

- Correct use of Markdown syntax.
- Inclusion of all required Markdown elements.
- Creativity and effort put into the content of your `Markdown-Exercise.md`.

Due Date

- The assignment is due by [01/31/2024].

This is a great opportunity to showcase your Markdown skills and creativity. We're excited to see your Markdown documents!
